

A new impulse to the European Advanced Biofuels Flightpath Initiative

The “[European Advanced Biofuels FlightPath](#)” initiative was set up as a roadmap to achieve an annual production of two million tons of sustainably produced biofuel for aviation by 2020.

A dedicated executive team, formed by SENASA, ONERA, Transport & Mobility Leuven and Wageningen UR, will coordinate for the next 3 years the stakeholder’s strategy in the field of aviation by supporting the activities of the Core Team and providing sound recommendations to the European Commission.

Core Team members

The Core Team brings together stakeholders from the Sustainable Aviation Fuels value chain, including biofuel producers, key actors aviation sector and European institutions. The Core Team coordinates, provides guidance and ensure coherences between the activities and inputs from the Executive Team and the Working Groups.

Om FN's verdensmål og luftfart

FN har vedtaget 17 verdensmål for en bæredygtig udvikling. Målene skal frem til 2030 være med til at sætte kursen frem mod en mere bæredygtig udvikling for hele kloden. Mobilitet og luftfart spiller en stor rolle i bestræbelserne på at nå mange af de 17 vedtagne udviklingsmål. Derfor har **IATA**, International Air Transport Association, der er ruteluftfartsselskabernes internationale brancheorganisation samt **ATAG**, Air Transport Action Group, der repræsenterer alle aktører i luftfartsbranchen, deltaget aktivt i at definere, hvordan luftfartsbranchen kan støtte de 17 verdensmål og være ansvarlig og engageret i forhold til målene. Organisationerne understreger, at det er generelle markeringer af relevans og indflydelse. Det er op til lokale luftfartsselskaber og lufthavne at anvende verdensmålene både som inspiration og som ramme for egne aktiviteter i relation til at arbejde med bæredygtighed.
